

LUIS BORGES

Senior Technical Program Manager | Infrastructure & Network Delivery

Irving, TX | US Citizen | 469.279.9909 | lborgesm@att.net | [linkedin.com/in/luis-borges-bsee-mba-16369a3](https://www.linkedin.com/in/luis-borges-bsee-mba-16369a3)

SUMMARY

I help tech organizations scale critical infrastructure programs, leading cross-functional teams through complex AI hardware deployments, 5G network systems, and data center initiatives. At Meta, I scaled a benchmarking platform from 1 to 8 workstreams while managing 700+ devices across 23 testbeds, and built AI-powered analytics tools using RAG, LLMs, and VLMs that reduced analysis time from days to minutes. My 21+ years span matrixed execution at Meta, Verizon, and Nokia, with expertise in NPI/PLM lifecycles and managing programs contributing over \$200M in revenue.

EXPERIENCE

Meta – Technical Program Manager – Menlo Park, CA (Remote)

Jun 2021 – Present

- Led infrastructure programs across Meta's matrixed organization, managing lab data centers, AI hardware systems, network infrastructure, and edge initiatives supporting Facebook, Instagram, WhatsApp, and Threads.
- Scaled a QoE and network benchmarking platform from 1 to 8 workstreams covering video, messaging, content creation, app performance, and competitive analysis, delivering 20% faster time-to-insight for product teams.
- Managed 700+ devices across 23 testbeds in 3 lab locations, increasing uptime from 80% to 96% during 5x fleet expansion through capacity planning, automation, and process improvements.
- Drove automation supporting 2.3M+ test jobs, 3.5M+ calls, 9.5M+ call minutes annually, and validation of 450+ Android and 200+ iOS builds.
- Led deployment of test infrastructure across multiple sites, including AI hardware platforms, core systems, RF isolation environments, GPS timing, IP networking, rack-and-stack, and power delivery for new compute units.
- Built AI-powered analysis tools and workflows using RAG pipelines, LLMs, VLMs, and Claude skills to generate dashboards, investigations, and reports in minutes instead of days, enabling broader self-service analytics.
- Owned NPI for AI rack and power deployments and ran the full NPI/PLM lifecycle, including EVT, DVT, PVT, and MP, in coordination with hardware, power, facilities, and network teams.
- Designed an MSP operating model with SLAs, RACI matrices, runbooks, and service management practices, enabling the lab to scale as a managed service for multiple partner organizations.
- Managed program risk and change control, implemented Kaizen-driven process improvements that reduced costs by 30%, secured \$2M in incremental funding, and delivered executive action plans driving measurable business outcomes.

Verizon – Senior Principal Systems Engineer – Southlake, TX

Jul 2020 – Jun 2021

- Delivered Dynamic Spectrum Sharing simulations and integrated 5G standalone core stacks in Kubernetes-based environments, enabling network planning teams to validate deployment scenarios before production.
- Supported end-to-end engineering, simulation, and analysis of wireless systems for 5G SA and 5G NR, evaluating functionality, performance, and robustness across operational scenarios.

Nokia – LTE & 5G Product Manager – Irving, TX

Jan 2019 – Jul 2020

- Managed IoT, 5G, and edge product offerings across North America and Latin America.
- Led full product lifecycle management across development, introduction, and market delivery, driving \$50M+ in sales through strategic roadmap execution and cross-functional delivery.

Nokia – Services Product Manager – Irving, TX

Jan 2016 – Dec 2018

- Served on the Executive Committee for the Mobile Broadband organization and drove product strategy and roadmap decisions for wireless customers across North America.
- Managed the full product lifecycle for RAN and Core portfolios with annual sales ranging from \$40M to \$100M.
- Supported LTE and 5G product introductions, earned the 2017 Nokia Award for LTE NPI contributions to T-Mobile and AT&T, and contributed to more than \$25M in sales revenue.

Nokia – Senior Technical Program Manager / Product Manager – Irving, TX

Dec 2012 – Dec 2015

- Led planning and specification for Packet Core and RAN products across complex multivendor environments.
- Introduced Care First Time Right and Change Control Board processes and earned the 2016 Nokia Award for live Packet Core network deployments.

Nokia Siemens Networks – Product Support Manager – Irving, TX

Jan 2011 – Nov 2012

- Managed nationwide network deployments, including 200+ network element integrations in multivendor environments.
- Built and ramped up a Nokia RAN lab and supported \$200M in contracts over five years.

Nokia Siemens Networks – Senior Product Support – Irving, TX

Aug 2009 – Nov 2010

- Led EPC and CS Core pilot projects and created a first-of-its-kind business continuity architecture for mission-critical Packet Core applications.

Nokia – Product Support Core Lead – King of Prussia, PA

Jun 2005 – Aug 2009

- Led EPC network architectural design and supervised 28 EPC deployments across T-Mobile and AT&T networks.

SKILLS

Program Management: Cross-Functional Leadership, Portfolio Management, Resource Allocation, Risk Management, RACI & SLA Design, Dependency Management, Deliverable Management

Project Management Tools: Microsoft Project, Atlassian, Asana, ServiceNow, Looker, Microsoft Teams, Bitbucket, ITSM, Jira, Smartsheet.

Technical Platforms: AWS, Kubernetes, Python, SQL, Git, AI Hardware, Cloud Computing, Benchmark Systems, RAG/LLM tooling, Claude skills

Telecom & Infrastructure: 5G, AI Infrastructure, Network Engineering, LTE, EPC/Packet Core, RAN, Wi-Fi/Cellular Networks, Data Center Infrastructure, AI Hardware Deployment

Methodologies: Agile, NPI/PLM Lifecycle, IT Service Management, KPI Management, Capacity Planning, Vendor Management, Kaizen, Cost Savings

Languages: English (fluent), Spanish (native)

EDUCATION

MBA — University of Dallas, Irving, TX, 2014

BSEE, Electrical Engineering — Universidad Central de Venezuela, Caracas, 1999

CERTIFICATIONS

CS50's Introduction to Programming with Python — Harvard/edX, 2023

5G New Radio (NR) — Nokia, 2017

Certified Network Associate — Cloud (NCIR) — Nokia, 2016

Certified Administrator for OpenStack (Professional) — Mirantis, 2015

Mobile Packet Core — Nokia, 2012

Senior EPC Solution Architect — Nokia Siemens Networks, 2010
